

Errata

Spatial Point Patterns: Methodology and Applications with R Baddeley, Rubak and Turner

1. Page 67, line 3 from bottom: In recent versions of the software, `package="spatstat"` needs to be replaced by `package="spatstat.data"`.
2. Page 68, line 4: likewise.
3. Page 68, line 6 from bottom: likewise.
4. Page 115, line 4 from bottom: the code should read

```
> Y <- eval.im(Z + 10)
```

5. Page 169, equation (6.9), the correct reference for Diggle's edge correction is not [222] but Diggle (2010), equation (18.9); see also Jones (1993).
 - Diggle, P.J. (2010) Nonparametric methods. Chapter 18, pp. 299–316 in A.E. Gelfand, P.J. Diggle, M. Fuentes and P. Guttorp (eds.) *Handbook of Spatial Statistics*, CRC Press.
 - Jones, M.C. (1993) Simple boundary corrections for kernel density estimation. *Statistics and Computing* **3**, 135–146.
6. Page 191, line 14: website `statscan.org` should read `satscan.org`
7. Page 261, line 2 of text: `tile.index` should be `tileindex`.
8. Page 308, Figure 9.3 caption: in the caption for the right panel, the name `code` should be `fit`.
9. Page 325, line 6–7 from bottom: the estimates of the coefficients in (9.27) are $\mu = -6.0184$, $\beta = -0.2047$, $\alpha_{\text{FALSE}} = 0$, $\alpha_{\text{TRUE}} = 2.0013$, $\gamma_{\text{FALSE}} = 0$ and $\gamma_{\text{TRUE}} = 0.1674$.
10. Page 344, lines 6–7: $\boldsymbol{\theta}$ and $\mathbf{Z}(u)$ should be column vectors.
11. Page 521, line 7: the fraction of contested area is $-C(u, \mathbf{x})$, not $C(u, \mathbf{x})$.
12. Page 535: `temper` should be `rtemper`.
13. Page 544: A term has been omitted in equations (13.55) and (13.57). The right hand side of (13.55) should include the additional term

$$+ \sum_{i=1}^n [\mathbf{Z}(x_i | \mathbf{x} \cup \{u\}) - \mathbf{Z}(x_i | \mathbf{x})]$$

and the right hand side of (13.57) should include

$$+ \sum_{j=1}^n [\mathbf{Z}(x_j | \mathbf{x}) - \mathbf{Z}(x_j | \mathbf{x} \setminus \{x_i\})].$$

14. Page 578, line 5: `plot(ProbU)` should be `plot(ProbD)`.

15. Page 786, reference [643]: volume number is **62**.

We thank **Suman Rakshit** and **Tilman Davies** for alerting us to some of these errors.
